

TRAINING, FACILITIES

(RO) CBRN Defence Training Range (CBRND TR)

(established in November 2019)

For Public Release

PROJECT DESCRIPTION

The project is designed to provide CBRND individual and collective training at EU level, both in simulated and live conditions, in order to increase the interoperability between EU Member States, by conducting training activities and tactical exercises as countermeasures to the current and persistent CBRN threats. Its implementation will support the specific needs for military training and evaluation of CBRND personnel assigned to EU BGs or participating in CSDP missions and operations. Furthermore, the project will provide benefits in areas of CBRND training standardization, efficiency and cost effectiveness, as well as to European industry by allowing its specialized CBRND manufacturing companies to test and evaluate new equipment and technologies.

OBJECTIVES/PRODUCTS

On short term, the project will focus on a large-scale modernization of the training range infrastructure in order to improve and extend the current staging and training conditions. On long term, the CBRND TR will host, on request, specific individual and collective training for pMS or multinational exercises based on CBRND scenarios.

Contribution to the more binding commitments

Yes

DELIVERABLES ACHIEVED

- Terms of Reference (ToR)
- Programme of Work (PoW)
- Memorandum of Understanding

EDA support

No

CRITERIA FOR SUCCESS

- Interoperable design of training and education
- Climate and environmental protection focus
- Synchronization of outcomes
- Expertise support from EDA and EUMS
