

STRATEGIC ENABLERS & FORCE MULTIPLIERS

(ES) ROLE 2F

(Established in May 2023)

For Public Release

PROJECT DESCRIPTION

The project aims to provide a conceptual description of the Medical Treatment Facility ROLE 2F, being the smallest medical treatment facility that allows the provision of damage control resuscitation and damage control surgery.

Through the definition of the treatment capacity and the different deployment modalities, the aim is to establish the technical requirements of the material, the training and education needs for the personnel, and the necessary support needed once deployed, both in terms of evacuation means and the continued support of this type of capacity with very high mobility and low logistical footprint.

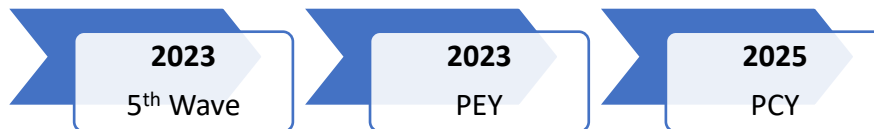

All of these refer to the contribution of ROLE 2F to medical support to the RDC in the different scenarios identified in the Strategic Compass.

OBJECTIVES/PRODUCTS

The intent of this project is to increase the EU's joint operational efficiency by developing the concept of the ROLE2 Forward.

INDICATORS

Project Execution Year (PEY) and Project Completion Year (PCY):

**DELIVERABLES ACHIEVED**

- The project is ongoing. The third working meeting took place in Madrid (Spain) on 29 January 2025.
- At this meeting the second draft of the concept was evaluated, and a third draft will be available in April 2025.

CRITERIA FOR SUCCESS

- The consolidated document is expected to be ready by the end of the first half of 2025.
